

**Alternating Magnetic Field**

### Alternating magnetic field

The alternating magnetic field, in conjunction with the titanium on the surface, stimulates circulation and the flow of lymph, which supports improved health.

Alternating magnetic field created by rotation of roller. No battery required.

**Titanium Shaft**

**Phiten Process**

**Acupressure Tip**

### Gold Silica Acupressure

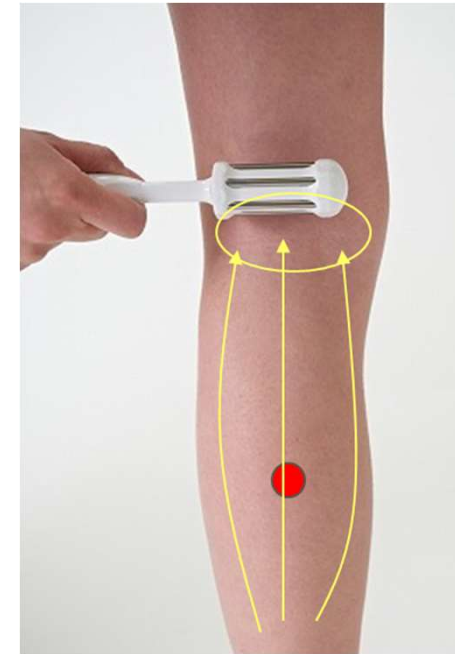

The soft elastomer resin tip containing AQUA GOLD silica, is used for acupressure points to promote circulation, relieve tension and pain and reduce swelling.

**AQUA GOLD** helps smooth neural transmission allowing the body to maintain a natural state of relaxation

### Phiten treated titanium shaft

Phiten treated titanium relaxes muscles, relieving tension and pain. Working in conjunction with the magnets, the tapping effect of the titanium stimulates skin activity and lymphatic drainage

Asisanri. Depressed area about 6 cm under the depressed area at side of kneecap.

Sho-zan. The centre of the boundary line between calf muscle and Achilles tendon.
